CITY OF BERKELEY

BERKELEY CITY COUNCIL SPECIAL MEETING

October 28, 2025

WEBVTT

00:00:03.000 --> 00:00:13.000
Okay, lovely. Alright.

00:00:13.000 --> 00:00:25.000
OK, hello everyone. Good afternoon. I am calling to order the special meeting of the Berkeley City Council today is Tuesday, October 28, th 2,025.

00:00:25.000 --> 00:00:34.000
Happy Halloween week to everyone. Can you please take the roll, Clerk? Here. Taplin presence.

00:00:34.000 --> 00:00:39.000
Bartlett here.

00:00:39.000 --> 00:00:40.000
Pleasant.

00:00:40.000 --> 00:00:48.000
By the skit of my teeth. Councilmember Blackaby is currently absent. Councilmember Lunapara Here.

00:00:48.000 --> 00:00:55.000
Humber here and Mary Ishi. Here. Okay, chorus president. All right, very good.

00:00:55.000 --> 00:01:07.000
Well, we have one item on our special agenda tonight on our, and that is the Ashby Bart East law transit oriented development request for proposal framework.

00:01:07.000 --> 00:01:08.000
And so I am going to start us off with a presentation. Actually, I'm not starting us off.

00:01:08.000 --> 00:01:16.000
The staff are going to start us off with a presentation. Actually, I'm not starting us off with a presentation.

00:01:16.000 --> 00:01:18.000
Thank you.

00:01:18.000 --> 00:01:26.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

Good afternoon, Mayor Ishi and members of the council. I'm pleased to introduce the topic of today's meeting, Mayor Ishi and members of the council.

00:01:26.000 --> 00:01:31.000
I'm pleased to introduce the topic of today's meeting, which is a study session on the Ashby E slot RFP process.

00:01:31.000 --> 00:01:49.000
The manager. For Housing and Community Services. This project is a result of a nearly decade long effort and collaboration with Bart and the community to advance transit oriented development at the North Berkeley and Ashby Bart stations.

00:01:49.000 --> 00:01:58.000
I'd like to acknowledge the efforts across departments, especially HHCS, planning the efforts across departments, especially HHCS, planning city attorney's office in the city manager's office.

00:01:58.000 --> 00:02:07.000
Many of the staff who have contributed are here today and will assist in answering any questions you may have. Including my colleagues at the table.

00:02:07.000 --> 00:02:17.000
Director Klein, who will be participating. In this afternoon's presentation and deputy city manager White who has provided leadership and support to this project.

00:02:17.000 --> 00:02:27.000
I'll now introduce Kirsten Dysinger with street level advisors. Who is managing the project and will lead today's presentation.

00:02:27.000 --> 00:02:40.000
Yeah. Thanks, Marco. Hello, Kirsten with Street Level Advisors. I support HHCs work on both BART sites and some other policy matters.

00:02:40.000 --> 00:02:47.000
Ground and affordable housing development, policy and planning. I'm joined today by my colleague Rick Jacobis.

00:02:47.000 --> 00:02:57.000
I'm really happy to be here to gather your input on the ESLOT developer selection framework as we move toward implementation and getting housing built on the E slot.

00:02:57.000 --> 00:03:01.000
Today I will quickly review the background on the East lot. The focus of the presentation today is on the ESLOT developer selection framework.

00:03:01.000 --> 00:03:13.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

The framework is included in the staff report. I'll explain the steps we took to create the framework and the content, the ESL project requirements.

00:03:13.000 --> 00:03:25.000
Goals and the selection process. Director Klein will provide an overview of the proposed design guidelines. Is it possible to pull your mic a little bit closer to or something?

00:03:25.000 --> 00:03:32.000
Yes, thanks. So the design guidelines which will be embedded in the RFP. We'll end today's discussion.

00:03:32.000 --> 00:03:41.000
With an overview of the selection process and next steps. It's the city's intention to release an RFP and NOFA early in the new year.

00:03:41.000 --> 00:03:50.000
The schedule will be finalized once the city has completed coordination with state HCD on compliance with the surplus land act.

00:03:50.000 --> 00:04:04.000
My goal is to keep this brief because we're expecting a really good conversation and community input today. This is a special moment for the city of Berkeley as we advance the 3rd transit oriented development project on the Bart site.

00:04:04.000 --> 00:04:05.000
The city has worked in close partnership with Bart, the community, and the community to develop a vision for the Ashby Bart Station.

00:04:05.000 --> 00:04:20.000
There are many parallels between the city's work at North and Ashby. The key principles such as a focus on affordable housing, high density transit oriented development.

00:04:20.000 --> 00:04:34.000
And a consideration of public open spaces are central to the vision for both stations. Unique to the Ashby site is that Bartoons 2 developal parcels the larger Westlot and the nearly 2 waker E slot.

00:04:34.000 --> 00:04:45.000
Consistent with the council approved exchange agreement the city will acquire the e slot for future development City ownership of the East lot is the impetus for today's working session.

00:04:45.000 --> 00:04:54.000
Unlike the North Berkeley Bart on the West slot or the West Lot, where Bart will maintain ownership on the east lot, the city will be the property owner.

00:04:54.000 --> 00:05:05.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

The city will solicit and select a development team. And the city has the opportunity and responsibility to define and implement the use of the East lot.

00:05:05.000 --> 00:05:14.000
Just a little bit on the background. The city and Bart have been. Closely collaborating over the past several years to bring transit oriented development to both sites.

00:05:14.000 --> 00:05:23.000
While the 2 stations follow similar steps, North Berkeley is ahead of Ashby. North Berkeley developer selection began in 2,022.

00:05:23.000 --> 00:05:33.000
And the development of the 1st phase is anticipated to begin in 2,026. Additional time was needed for the city and Bart to negotiate the exchange agreement at Ashby.

00:05:33.000 --> 00:05:44.000
So just zooming in on Ashby milestones. Really the work started in 2,018 with the state legislation that focused on TOD in the station areas.

00:05:44.000 --> 00:05:55.000
The City Council committed 53 million dollars to the Bart sites of housing trust fund dollars of which 8 million will be available for the E slot.

00:05:55.000 --> 00:06:09.000
And between 2,018 and 2,022 the city and Bart approved an MOU and a subsequent Vision and Priorities or JVP, which establishes requirements goals and resources for future development.

00:06:09.000 --> 00:06:21.000
Late last year, counsel in the board board approved the exchange agreement, a real estate agreement for Ashby Bart, including project requirements for affordable housing and other community benefits.

00:06:21.000 --> 00:06:29.000
Bart has advanced work on the Ashby West lot, issuing an RFP late in 2,024 and selecting the development team over the summer.

00:06:29.000 --> 00:06:33.000
We're here today to advance the work on the E slot.

00:06:33.000 --> 00:06:39.000
And I just want to zoom into the E slot for just a minute. To get familiar with the site.

00:06:39.000 --> 00:06:47.000
It's behind Ed Roberts campus. It's just under 2 acres. It's bordered by Adeline Woolsley and Tremont.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:06:47.000 --> 00:07:00.000
The site currently provides and will continue to provide vehicle access to the Ed Roberts campus. And currently Bart owns the lot and is operating rider parking on the lot.

00:07:00.000 --> 00:07:06.000
This year, HHCS has begun work to advance the implementation phase for the ESLAT.

00:07:06.000 --> 00:07:11.000
The next step is to solicit a development team.

00:07:11.000 --> 00:07:19.000
We are seeking your input on the framework. Which HHCS will translate into an RFP or request for proposals.

00:07:19.000 --> 00:07:28.000
What will the RFP include? A development RFP explains to prospective developers desired outcomes, constraints and considerations.

00:07:28.000 --> 00:07:39.000
It can be a lengthy document. As it provides a list of information development teams must provide. Such as a site plan, a financial plan, and details on their team.

00:07:39.000 --> 00:07:46.000
It will include an overview of the selection process, spelling out timelines and steps such as interviews.

00:07:46.000 --> 00:07:56.000
And public presentations. Specific to the ESLot RFP, it will include threshold requirements which are required project elements.

00:07:56.000 --> 00:08:05.000
And other requirements such as E slot design standards and the E. Slav RFP will include evaluation criteria and project goals.

00:08:05.000 --> 00:08:11.000
Which signal to potential teams how proposals will be evaluated.

00:08:11.000 --> 00:08:19.000
The East lot is public land. The city through various planning efforts has identified many goals for the East slot.

00:08:19.000 --> 00:08:29.000
The city's goals for the East lot are ambitious. And to be clear, no one project could achieve all of the goals included in the framework.

00:08:29.000 --> 00:08:37.000
The framework intends to balance the many laudable potential uses for this East lot within the constraints of what might be feasible.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:08:37.000 --> 00:08:46.000
Our intent is to create a healthy competition among development teams. And encourage feasible proposals that walk towards the city's goals.

00:08:46.000 --> 00:09:03.000
The 2 main constraints on the E slot are space and subsidies for affordable housing. Architects and developers will complete technical work to develop feasible proposals that must meet the project requirements and will also service the city's goals.

00:09:03.000 --> 00:09:12.000
Next I want to describe the steps HHCS undertook in collaboration with planning city manager and city attorney to develop the framework before you.

00:09:12.000 --> 00:09:18.000
As a 1st step, we reviewed the recent plan documents. Especially the exchange of agreement on JVP.

00:09:18.000 --> 00:09:30.000
Both approved by Council and the Bartboard and both establish goals and requirements for the East Lot. The majority of the elements in the framework come from these foundational documents.

00:09:30.000 --> 00:09:44.000
The requirements and goals identified in the exchange agreement are binding terms. The city committed to incorporating these. B The city.

00:09:44.000 --> 00:09:49.000
Just a minute. Good start. Okay, sorry. Go ahead, please.

00:09:49.000 --> 00:09:53.000
Alright. OK, so we're talking about what's in the exchange agreement and how those terms are binding.

00:09:53.000 --> 00:10:05.000
So the city committed to incorporating these elements into future development of the site. And we are not anticipating further input on those today.

00:10:05.000 --> 00:10:14.000
Other goals and aspirations identified in the community planning process, especially those detailed in the JVP, are also incorporated into the framework.

00:10:14.000 --> 00:10:25.000
Well, these are not legally binding. They reflect outcomes of years of community conversation, staff work, and council agreements with the BART board.

00:10:25.000 --> 00:10:35.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

The framework and the staff report indicates with bold font when elements originated from the exchange agreement and with aalics when they originated from the JVP.

00:10:35.000 --> 00:10:46.000
So as a next step, we reviewed city policies programs and related requirements like the Housing Trust Fund guidelines, the housing preference policy, and the zoning code.

00:10:46.000 --> 00:10:54.000
And those were tucked into the framework. And then we had our draft framework. And our next step was to hold a stakeholder meeting.

00:10:54.000 --> 00:11:09.000
Last summer in summer of 2,025. HHCS hosted a meeting with representatives from key community groups including the Center for Independent Living, Healthy Black Families, Black Repertory Theater.

00:11:09.000 --> 00:11:15.000
They of Bob, LBA, South Berkeley now, Great Panthers, the Lighthouse.

00:11:15.000 --> 00:11:20.000
East Space Center for the Blind. And the host of the meeting, the Ed Roberts campus.

00:11:20.000 --> 00:11:30.000
You're HHCS informed community representatives of the proposed developer selection process and timeline. We engaged community members on the requirements and the goals for the site.

00:11:30.000 --> 00:11:39.000
This slide identifies key themes discussed during the meeting. The staff report includes the complete comments from the meeting.

00:11:39.000 --> 00:11:45.000
The developer selection framework presented to you today incorporates input from this session.

00:11:45.000 --> 00:11:46.000
Okay, we're going to get into the actual framework itself. So we're going to start with the thresholds.

00:11:46.000 --> 00:12:07.000
Those are the requirements. They're not flexible. They're terms of the city and barts exchange agreement or city policy and proposals must achieve these outcomes on their project and barts exchange agreement or city policy and proposals must achieve these outcomes on their project and if they don't they will not advance through the selection process.

00:12:07.000 --> 00:12:17.000
The 1st is a minimum of 300 bedrooms. The second is a minimum level of affordability of 35%.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:12:17.000 --> 00:12:27.000
And they do a lot of percent. So, of which, 20% must be reserved for extremely low income households, and that would mean 7% of the whole project.

00:12:27.000 --> 00:12:36.000
And then the remainder of the affordability should prioritize low and very low and average at most, 60% AMI.

00:12:36.000 --> 00:12:53.000
If anyone needs that again, I can do it again. It also includes a community benefits fund with a minimum of $150,000 annually for the South Berkeley and a minimum developer experience as described in the city's guidelines.

00:12:53.000 --> 00:12:59.000
Those 4 elements all projects must achieve.

00:12:59.000 --> 00:13:08.000
Next, we're going to talk about requirements and goals. So goals are things people are striving for within their proposal and requirements are things they must do.

00:13:08.000 --> 00:13:16.000
And I'm going to look at them topic by topic. This 1st slide, the next slide, the housing commitments shows.

00:13:16.000 --> 00:13:30.000
Commitments that the City of Berkeley made in the exchange agreement both around the requirements that we just discussed and also the exchange agreement included a few housing goals.

00:13:30.000 --> 00:13:33.000
So for example, on density, the requirement is 300 bedrooms, but the goal is to maximize density.

00:13:33.000 --> 00:13:51.000
So proposals will be asked to show how they are striving towards that goal. And the second housing commitment, again the 35% affordability, but there is a goal of 50% affordability and respondents will be asked to show how they could make their project 50% affordable.

00:13:51.000 --> 00:14:15.000
What additional subsidy or approach might be necessary to achieve that? Again, these 4 elements all come from the exchange agreement and so the city in previous actions all come from the exchange agreement and so the city in previous actions committed to including them in previous actions committed to including them in the RFP.

00:14:15.000 --> 00:14:26.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

Beyond affordability levels and and Berkeley's local local preference policy. The planning process identified several potential priority households for the East lot.

00:14:26.000 --> 00:14:33.000
The JVP and more recently the Stakeholder Working Group the summer identified a few different ones that are shown here.

00:14:33.000 --> 00:14:40.000
Serving households. Seniors, families, and people with physical or mental disabilities or formerly homeless people.

00:14:40.000 --> 00:14:47.000
Prioritize housing for people with disabilities in response to the proximity of Ed Roberts campus.

00:14:47.000 --> 00:14:56.000
We added a goal of development team having a creative approach to universal design.

00:14:56.000 --> 00:15:06.000
And also the goal of homeownership opportunities with the goal of building equity. Within the home ownership. These are not project requirements.

00:15:06.000 --> 00:15:15.000
Pros and teams should strive to respond to these housing priorities while we don't expect that the ESLOT has the space or financial resources to achieve all of these priorities.

00:15:15.000 --> 00:15:26.000
We are challenging development experts to propose a feasible approach that incorporates requirements, site constraints, and moves towards these goals.

00:15:26.000 --> 00:15:27.000
At the core of the work at the Ashby Bart Station is Berkeley's commitment to reparations.

00:15:27.000 --> 00:15:49.000
The exchange agreement includes a threshold requirement and goal to advance reparations. And we talked about this already, but the project will be required to make minimum contributions of approximately $150,000 a year to the South Berkeley Community Fund.

00:15:49.000 --> 00:16:01.000
This is detailed in the exchange agreement, including an annual escalation and a start date of 4 years after the housing is built.

00:16:01.000 --> 00:16:15.000
Additionally, and this is where the goal comes in, teams will be asked to describe how their proposed project would address the negative impacts to

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

African-american residents, businesses, and cultural institutions displaced by the Ashby Bart.

00:16:15.000 --> 00:16:26.000
Again, this is an invitation for developers to respond to this prompt. And thoughtfully, meanfully responses will be rewarded with additional points.

00:16:26.000 --> 00:16:34.000
And next we're going to talk about the development team. The framework includes detail on requirements for the development team.

00:16:34.000 --> 00:16:43.000
The requirements are a means to protect the city's investments in the East lot, including the land, the use of housing trust fund dollars, and the community planning work.

00:16:43.000 --> 00:16:50.000
And any of the development team requirements parallel the city's long-standing requirements for use of the Housing Trust Fund dollars.

00:16:50.000 --> 00:16:59.000
These requirements are the city and communities means of ensuring that housing will get built in a timely and efficient manner.

00:16:59.000 --> 00:17:03.000
I referenced earlier that both financial feasibility and law constraint and lots sites can stream the ability to meet all the different goals we just talked about.

00:17:03.000 --> 00:17:21.000
I want to spend a few minutes walking through a few key goals and exploring how the city team differentiated between what a project would be required to do and what a project would be asked to strive towards or what the goal might be.

00:17:21.000 --> 00:17:30.000
We're going to start with the 50% affordability requirement or the affordability requirement. So both North Berkeley.

00:17:30.000 --> 00:17:38.000
The requirement is for 35% affordability and this is came from the JVP which covered both sites.

00:17:38.000 --> 00:17:49.000
At the West Lot, the RFP required 50% and that was more a product of the land exchange than a changing sort of threshold.

00:17:49.000 --> 00:17:57.000
The city has committed 8 million dollars in housing trust fund dollars. They'll offer a LAN discount for the affordable units.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:17:57.000 --> 00:18:15.000
And the market rate housing will be required to contribute funds to support the affordable housing. And the 35% scenario, we are able to generate a local match at the matching or exceeding levels that have successfully leveraged state funds.

00:18:15.000 --> 00:18:25.000
I have to take this off. So you can see that at 35% we anticipate the local match would be 200 to $230,000 per affordable unit.

00:18:25.000 --> 00:18:33.000
And that is a really competitive spot for the developer to try and attract and secure those state funding necessary to get to the construction.

00:18:33.000 --> 00:18:49.000
In contrast with the 50% affordability. The 8 million dollars is still there from the housing trust fund However, the developer market rate contribution would go down because there would be fewer market rate units.

00:18:49.000 --> 00:18:55.000
So we're estimating that the local subsidy would be closer to 165 to 195.

00:18:55.000 --> 00:19:07.000
Per unit. That means that the developer would need to be seeking more subsidy per affordable unit and also a greater total subsidy because there would be more affordable units.

00:19:07.000 --> 00:19:17.000
Needing more dollars each. So our concern with making 50% of requirement is we may create a project that developers can't finance.

00:19:17.000 --> 00:19:24.000
We are asking. Development teams to use their expertise and show us how they might be able to get there and if they can get there.

00:19:24.000 --> 00:19:33.000
And the 50% affordability goal will be heavily incentivized. The next school I want to talk about is homeownership.

00:19:33.000 --> 00:19:43.000
Affordable homeownership can be a valuable opportunity for households to build equity. New construction of affordable ownership has higher costs.

00:19:43.000 --> 00:19:52.000
It has limited subsidy sources. And it generally serves a higher income. Usually ownership is 80 to 120.

00:19:52.000 --> 00:20:10.000
Some programs go below that whereas the goals for the He slot range lower for the rental product. So we don't have the federal and state programs

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

to provide the majority of the dollars and there are not really any other programs.

00:20:10.000 --> 00:20:17.000
There's the one small state program that would help. Home ownership at 80% AMI but or below.

00:20:17.000 --> 00:20:30.000
We still wanted to take a closer look at this because we do believe that equity building is important. So we imagined a project on the site where some of the affordability was achieved through rental.

00:20:30.000 --> 00:20:44.000
There was a market rate component and then 63 units were affordable home ownership. And then we looked at spreading that 8 million dollars of local subsidy and the developer contribution across both affordable buildings.

00:20:44.000 --> 00:20:50.000
And our estimate is that there would be about $160,000 for each affordable homeownership unit.

00:20:50.000 --> 00:21:00.000
But the developer couldn't take that and try and leverage outside state sources because there aren't sources to match the way we could with the rental product.

00:21:00.000 --> 00:21:11.000
Would leave a gap of about 695 for $1,000 for each unit. So in this scenario, we imagined it would be a gap of 16 million dollars for the whole project.

00:21:11.000 --> 00:21:25.000
For that reason, the difficulty of financing and developing affordable home ownership. We wanted to leave it as a goal, but resists the requirement there.

00:21:25.000 --> 00:21:35.000
Okay, and then the last school I want to focus in on. Is the clear stakeholder support for responding to Ed Roberts campus.

00:21:35.000 --> 00:21:49.000
Requiring accessibility. Teams will be asked to have a creative and innovative approach to universal design. And they'll be asked to include a design team with demonstrated universal design experience.

00:21:49.000 --> 00:22:04.000
And expertise. We were concerned to creating a more specific requirement could unintentionally create a conflict with density requirements, affordability requirements, or the overall financial feasibility of the project.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:22:04.000 --> 00:22:11.000
We don't have the technical work to kind of draw a line there. Asking developers to maximize housing for disabled communities.

00:22:11.000 --> 00:22:23.000
We're looking for proposals that are feasible, grounded in technical analysis such as site design, cost estimates, and reviewing possible funding sources to support the development.

00:22:23.000 --> 00:22:29.000
Again, we're in making an invitation to the teams to compete for the site.

00:22:29.000 --> 00:22:37.000
Alex, Director Klein from the Planning Department will present on a series of design guidelines specific to the E slot.

00:22:37.000 --> 00:22:47.000
He's designing guidelines will be embedded in the future RFP. Our approach here is similar to the approach on the West lot where the design guidelines were provided with the RFP.

00:22:47.000 --> 00:23:03.000
Thanks, Kirsten. Good afternoon, Council members. For the For the North Berkeley bar station, the city developed a detailed objective design standards to help shape that project.

00:23:03.000 --> 00:23:12.000
And those were formally adopted by Planning Commission and City Council. And we're pursuing the same approach for the West Lot.

00:23:12.000 --> 00:23:17.000
That's because as you just heard from Kirsten for the East lot, we're gonna own the land.

00:23:17.000 --> 00:23:30.000
And so we will have the opportunity to leverage our ownership of the project to shape the design. So the design, the actual design of the project will be subject to a community process.

00:23:30.000 --> 00:23:46.000
And approval. So for the design standards We're including just a few simple design standards in the solicitation to help complement the existing RBMU zoning.

00:23:46.000 --> 00:24:00.000
And that are consistent with the years of planning efforts that we've conducted for this project. I'm going to give you a brief overview of those design standards now to complete design standards are available as an attachment and staff report.

00:24:00.000 --> 00:24:10.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

Short, just a 3 page document. Let's go to the next slide. You can see here the guiding principles for these design guidelines.

00:24:10.000 --> 00:24:25.000
Firstly, ensuring access and loading, not just for the project, but also for the adjacent Ed Roberts campus and loading not just for the project but also for the adjacent Ed Roberts campus supporting pedestrian friendly streets and creating great, new open spaces.

00:24:25.000 --> 00:24:35.000
Maintaining neighborhood scale transition. So transitions between this site is obviously going to be a lot denser than the surrounding single-family homes. So transitions between this site is obviously going to be a lot denser than the surrounding single family homes.

00:24:35.000 --> 00:24:42.000
So trying to facilitate transitions and requiring high quality design but also you've heard us emphasize feasible delivery.

00:24:42.000 --> 00:24:50.000
We don't want to impose any design standards that are going to render this project unable to deliver.

00:24:50.000 --> 00:24:58.000
Next slide. So here are a few examples of design standards related to site planning open space and streetscape.

00:24:58.000 --> 00:24:59.000
Maintain the access drive from Adeline Street to Wolsey, as you'll see on a site diagram in just a moment.

00:24:59.000 --> 00:25:16.000
And we're also going to require that that new public open space be provided along public streets so that they're publicly accessible.

00:25:16.000 --> 00:25:32.000
And just we have just a few standards related to building form massing and facade design so that includes a 10 foot setback for any ground floor residential and a 15 foot step back above the 4th story.

00:25:32.000 --> 00:25:41.000
So again, that's about creating those transitions. I mean, the dense part of the project and the single family zones.

00:25:41.000 --> 00:25:51.000
And here's a diagram and you can see a lot of those standards that I just went through pictured on this diagram including the access drive.

00:25:51.000 --> 00:26:06.000
The Ed Roberts campus does actually have an easement on the property for access. So that drive provides accessibility loading and also 4 to 6 ADA loading spaces.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:26:06.000 --> 00:26:12.000
I'm going to turn it back over to Kristen now.

00:26:12.000 --> 00:26:23.000
Thanks, Jordan. Next I want to spend a couple of minutes just talking about the process once the proposals come in how will a developer be selected.

00:26:23.000 --> 00:26:28.000
And we are paralleling the process that was done on the West slot. So there will be an evaluation committee.

00:26:28.000 --> 00:26:45.000
We're proposing that committee includes city staff. Subject matter experts, staff conversant and development planning and affordable housing finance a community member and one community member similar to the structure of the Westlott evaluation committee.

00:26:45.000 --> 00:26:54.000
The proposals will be evaluated. A subset of teams will be interviewed by the evaluation committee.

00:26:54.000 --> 00:27:07.000
And a subset of the teams will be invited to make a public presentation. Before a recommendation is made to the council and the council would approve the selected developer.

00:27:07.000 --> 00:27:24.000
We've been talking a lot about the RFP. Just like on the other sites, we'll be pairing the RFP with NOFA or notice of funding availability and that will be a portion of the previously reserved 8 million dollars of housing trust fund.

00:27:24.000 --> 00:27:32.000
Today HHCS seeks authorization to utilize up to $500,000 of those funds to implement the exchange agreement.

00:27:32.000 --> 00:27:40.000
And potentially take title of the East lot. This would be an allocation of a portion of the 8 million previously reserved for the ESLAT.

00:27:40.000 --> 00:27:53.000
This authorization will enable the city to acquire the site from B. Prior to issuing the RFP, if that is deemed a necessary step to comply with state law.

00:27:53.000 --> 00:28:03.000
As with the developer solicitations for North Berkeley and the West Lot, the RFP will also be issued with up to 1 million dollars to support pre-development activities.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:28:03.000 --> 00:28:12.000
Okay. Let's just take a quick look at timeline and next steps and then we can get ready for our questions and discussion.

00:28:12.000 --> 00:28:20.000
As I said, it's the city's intention to release an RFP and NOFA early in 2,026.

00:28:20.000 --> 00:28:29.000
This could be delayed if surplus land act compliance necessitates that the city hold title to the land prior to issuing the RFP.

00:28:29.000 --> 00:28:38.000
You may know the surplus land act is intended to ensure that public lands are prioritized for housing development, is intended to ensure that public lands are prioritized for housing development, especially affordable housing.

00:28:38.000 --> 00:28:48.000
As is contemplated for the East lot. Staff are coordinating closely to ensure Berkeley's selection process aligns with statutory requirements.

00:28:48.000 --> 00:29:01.000
It is the city's preference to delay site acquisition. Enabling Bart to continue to operate the site as transit rider parking until the development team is ready to begin construction.

00:29:01.000 --> 00:29:11.000
The city will continue to coordinate closely with HCD and BART with the intention of assuring compliance and optimal project outcomes.

00:29:11.000 --> 00:29:24.000
Okay, so after the RFP has issued either in the new year or shortly after that, we expect either in the new year or shortly after that, we expect the process to take about 6 months before we're selecting a developer or shortly after that, we expect the process to take about 6 months before we're selecting a developer.

00:29:24.000 --> 00:29:26.000
That's very similar to that. We expect the process to take about 6 months before we're selecting a developer.

00:29:26.000 --> 00:29:27.000
That's very similar to what took place for a developer. That's very similar to what took place for North Berkeley and the West Slot.

00:29:27.000 --> 00:29:35.000
As I said, those steps would include interviews, public presentations, and evaluation, and then ultimately the approval of this council.

00:29:35.000 --> 00:29:44.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

Once that's done, the developer would lead a community planning process and also enter into negotiations with the city for the land.

00:29:44.000 --> 00:29:53.000
So the vehicles for that would be an exclusive note negotiating agreement and our ground lease or sale. So desired.

00:29:53.000 --> 00:30:01.000
That phase we're estimating to take. I can't actually can't see that with my glasses on.

00:30:01.000 --> 00:30:08.000
We're waiting for that to take a few years, which would lead into construction. Thank you. Oh, there you go.

00:30:08.000 --> 00:30:24.000
We're almost done. OK, so for North Berkeley, it took 4 years from solicitation to the anticipated 1st phase of for the E slot, we may be able to achieve those same steps in a shorter period, given that the project is less complex.

00:30:24.000 --> 00:30:32.000
It doesn't have major new infrastructure. It's a smaller site. It doesn't have to design around a BART station.

00:30:32.000 --> 00:30:44.000
The land negotiations and entitlements will be with the city rather than city and Bart. So for those reasons we might even be able to move a little bit faster and see housing sooner.

00:30:44.000 --> 00:30:51.000
Staff and consultants are prepared to answer questions. Thank you for your attention. This is a really exciting moment for the E slot.

00:30:51.000 --> 00:30:59.000
We look forward to your input and comments on the framework. Thank you. Thank you. Thank you so much.

00:30:59.000 --> 00:31:08.000
I appreciate the presentation and thank you so much for I appreciate the presentation and thank you so much for I know you all did a lot of work on reorganizing and clarifying certain points.

00:31:08.000 --> 00:31:23.000
So I really appreciate that. Thank you. And I, what I want to do is I want to take questions first, st but then I want to get public comments before we give our comments, because I know we have a number of folks here to speak on this.

00:31:23.000 --> 00:31:31.000
And I want to start actually with the council members for the district too. Thank you. 2 isn't as well.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:31:31.000 --> 00:31:41.000
District 3, but 2 is a 2, but I'm as well. Yeah, thank you for a great report.

00:31:41.000 --> 00:31:53.000
Me at all. I don't have any questions. I mean, this all very, I understand your methodologies, understand the cost drags, understand the cost drags, the, I understand your methodologies, understand the cost drags, the opportunities, timelines.

00:31:53.000 --> 00:31:59.000
You know, comments we get to later, I guess.

00:31:59.000 --> 00:32:16.000
But essentially, Yes, so one question is the 300 bedrooms. So how do we arrive at that number and is that a plus or minus and what kind of range could we be looking at?

00:32:16.000 --> 00:32:21.000
So art negotiations with Bart that ultimately culminated in the exchange agreement adopted by Councillors Bart that ultimately culminated in the exchange agreement adopted by Council Aspal were lengthy.

00:32:21.000 --> 00:32:45.000
And Bart's goal was really that felt very strongly about maximizing the number of bedrooms because that will support ridership and for the lot that they'll own it will boost the value of the land.

00:32:45.000 --> 00:32:54.000
The 300 bedroom. Number. There were a few different factors that led to us landing on that.

00:32:54.000 --> 00:33:11.000
It was informed by a capacity analysis that was studied to understand how much could we fit in roughly 7 story project so consistent with the zoning established not not just locally but also through state law under AB.

00:33:11.000 --> 00:33:25.000
2923. And it was also informed by some economic analysis. That was conducted. Jointly by consultants engaged.

00:33:25.000 --> 00:33:34.000
By the city of Berkeley and Bart to ensure that both the city and Bart were getting a fair exchange.

00:33:34.000 --> 00:33:45.000
Through the exchange of the air rights of the West lot and the East lot. So the financial analysis and the capacity analysis both informed that number.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:33:45.000 --> 00:33:54.000
Okay. So it's more it's more of a just a capacity. Sort of conversation. Okay.

00:33:54.000 --> 00:34:02.000
Yeah, that's really normal questions. Just comments we can get into later. Thank you. Are there any other questions?

00:34:02.000 --> 00:34:10.000
From books. Oh, sorry. Councilmember Tregu, I see your hand.

00:34:10.000 --> 00:34:26.000
Thank you so much. For the presentation. I just had a couple of questions. my staff did have conversations with CL that reached out to us.

00:34:26.000 --> 00:34:38.000
And while I think all the requests. That they provided inviting, reflected. In the staff report.

00:34:38.000 --> 00:34:49.000
Can you please confirm that? The requested tasks that were mentioned in the letter from this organization are already included.

00:34:49.000 --> 00:35:02.000
In the RFP. Or in staff's opinion is there an opportunity or a need to add any language to strengthen the our feet to reflect.

00:35:02.000 --> 00:35:13.000
These points. I've had a second. Question, but I will. Stop here.

00:35:13.000 --> 00:35:22.000
Yeah, I can take a I'll take a stab at answering the 1st question. So the letter and comments from CIL were received into the record as public comment for this meeting.

00:35:22.000 --> 00:35:39.000
They aren't reflected in the staff report itself, what's reflected in the staff report is the feedback that we received through the stakeholder meeting through that process.

00:35:39.000 --> 00:35:55.000
We, we, at the task they've identified are not specifically in the RFP, we haven't drafted the RFP, so we've only drafted the framework for the RFP and this meeting is our opportunity to get input, including public comment.

00:35:55.000 --> 00:36:07.000
So I anticipate that CIA will provide some public comment. But again, this was received. As public comment and I think Kirsten, are you looking to see which items are already in the framework?

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:36:07.000 --> 00:36:13.000
Do you want to?

00:36:13.000 --> 00:36:21.000
We're gonna have to take a minute to review this, which we'll do during public comment and be prepared if that's acceptable.

00:36:21.000 --> 00:36:22.000
That makes sense.

00:36:22.000 --> 00:36:26.000
That sounds great.

00:36:26.000 --> 00:36:41.000
I had another question, but I might just. Make it as part of a comment later, but I I'm wondering if staff might consider, well.

00:36:41.000 --> 00:36:48.000
I understand that there is, one member of the community. That is you know the proposal includes one member of the community.

00:36:48.000 --> 00:37:00.000
To be a part of a advisory task force.

00:37:00.000 --> 00:37:29.000
I'm curious. What if any definitions there might be around what constitutes a community member for instance might pertinent lived experience be part of something that could be a criterion.

00:37:29.000 --> 00:37:42.000
I don't think we have that level of specificity outlined there. So criteria are. I think appointed a member of the community appointed by the city manager.

00:37:42.000 --> 00:37:49.000
I think it's that simple, but happy to take your input on whether and how that should be more specifically to take your input on whether and how that should be more specifically defined.

00:37:49.000 --> 00:37:51.000
Thank you so much.

00:37:51.000 --> 00:37:55.000
Thank you. Any other questions? Oh, Councilmember Bakobi. Thanks, Madam Mary.

00:37:55.000 --> 00:38:01.000
I just had 2 questions and thanks to the team for the great presentation. Sorry, I was a few minutes late.

00:38:01.000 --> 00:38:06.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

Was coming back from a parent teacher conference which went well in case everyone wanted, but it was really good.

00:38:06.000 --> 00:38:11.000
Was on the reparation commitment the South Berkeley Fund. I appreciated seeing this kind of an effort to address the negative impact historically to African-american residents.

00:38:11.000 --> 00:38:24.000
Do you have any ideas, vision, examples? What might this look like or what might we expect this to fund?

00:38:24.000 --> 00:38:28.000
Do you have some examples of what I'm just curious?

00:38:28.000 --> 00:38:44.000
Yeah. And we've had some discussions about how it's an unformed opportunity for the city and the council just to put a timeline on it so you understand where we need to be in developing the concepts.

00:38:44.000 --> 00:38:54.000
I just outlined for you that it's about 4 years until we hit construction and that fund won't start accruing until about 4 years after that after construction is completed.

00:38:54.000 --> 00:38:59.000
So we have some time and we'd certainly collect input about 4 years after that after construction is completed.

00:38:59.000 --> 00:39:09.000
So we have some time and we'd certainly collect input here to start that. So we have some time and we'd certainly collect input here to start that process, but we'd certainly collect input here to start that process, but certainly it wouldn't need to collect input here to start that process, but certainly it wouldn't need to be incorporated in the RFP or things like that process, but certainly, it wouldn't need to be incorporated in the RFP or things like that.

00:39:09.000 --> 00:39:11.000
I've seen like CFC, it wouldn't need to be incorporated in the RFP or things like that.

00:39:11.000 --> 00:39:16.000
I've seen like CCBG type committees where communities have oversight but the city administers that's probably a model that would make a lot of sense for this.

00:39:16.000 --> 00:39:26.000
Probably the proposed allocation could define some of the mechanisms as well. So I'm not quite sure how the city will advance it, input today.

00:39:26.000 --> 00:39:32.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

So the developer may not prescribe necessarily what they're going to do with the fund. They're just going to allocate.

00:39:32.000 --> 00:39:37.000
In the. I think it's pretty clear that the developer won't determine that the expenditures.

00:39:37.000 --> 00:39:41.000
They might determine how it's funded. It's pretty clear that the developer won't determine the expenditures. They might determine how it's funded.

00:39:41.000 --> 00:39:52.000
We've said it needs to be a minimum of 150. Maybe they'll find more or maybe they'll do it earlier than required, but it is certainly not for the developer to expand.

00:39:52.000 --> 00:40:10.000
Home ownership, it feels kind of just from the slide and from the discussion. It feels like you're, I mean, it's a good goal, but you kind of lower our expectations based on the economics as to whether or not this is going to be feasible given the way this may or may not pencil, is that a fair?

00:40:10.000 --> 00:40:15.000
Take away again, I know you're not trying to put the thumb on the scales and we obviously want the developers to come back with this ambitious proposal as they can.

00:40:15.000 --> 00:40:22.000
You're tempering our expectations a little bit in terms of what you put here. I think that's the intention of keeping it as a goal.

00:40:22.000 --> 00:40:40.000
There might be a savvy developer out there that has cracked the model on affordable home ownership and they're excited to do it here and they see an opportunity, but I did have a chance to review your social housing study and I noticed that they came to that same conclusion of like, hey, you can do affordable homeownership.

00:40:40.000 --> 00:40:48.000
It's really, really hard, especially new construction. Acquisition and rehabilitation has a much lower cost.

00:40:48.000 --> 00:40:58.000
And direct assistance to homeowners has a lower cost. So there might be an opportunity to establish affordable homeownership.

00:40:58.000 --> 00:41:07.000
But not on the site. But in South Berkeley and still achieve those same policy objectives and there might even be ways to tether it to the project objectives.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:41:07.000 --> 00:41:09.000
And there might even be ways to tether it to the project, but that's sort of an open question.

00:41:09.000 --> 00:41:13.000
And there might even be ways to tether it to the project, but that's sort of an open question, but I think you're reading the feasibility point really clearly.

00:41:13.000 --> 00:41:21.000
OK, thank you very much. Any other questions? Council? Okay, let's do some public comment.

00:41:21.000 --> 00:41:26.000
Public comment.

00:41:26.000 --> 00:41:39.000
Okay. I was expecting a rush to the podium. Okay. How many people are speaking?

00:41:39.000 --> 00:41:50.000
And I'd like to get a sense of how many folks do we have online as well. Okay, so at least 1, 2, 3.

00:41:50.000 --> 00:41:54.000
Anyone else for?

00:41:54.000 --> 00:42:03.000
4. If you're interested in giving public comment, can you line up so we know how many folks are actually speaking, please.

00:42:03.000 --> 00:42:13.000
You think I got it? Just survive and so far. On the zoom. 7.

00:42:13.000 --> 00:42:21.000
If we have more than 10, then I want to do a minute. Yeah. So there's 1 min per speaker.

00:42:21.000 --> 00:42:30.000
People can yield time to speakers up to maximum of 4 min for any one speaker.

00:42:30.000 --> 00:42:38.000
So we can start with in person comments.

00:42:38.000 --> 00:42:49.000
Yeah. But you see, Council, this is a great opportunity to continue the legacy. Dr. Victor Peneda, executive director of the Historic Center for Independent Living.

00:42:49.000 --> 00:43:04.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

We have had a 54 year. History with the cloudy and the city and inventing what is the modern disability rights movement.

00:43:04.000 --> 00:43:13.000
Specifically, on the east lot we have. Developed over 5 years of research. My other job was for 50 years.

00:43:13.000 --> 00:43:20.000
And the faculty of UC Berkeley is a problem. See there, original planning of advice payers of cities.

00:43:20.000 --> 00:43:32.000
Around the world on how to build exclusive cities. And we're 2 books all the time. I mean, as a Berkeley resident for 28 years, there is no property in the city.

00:43:32.000 --> 00:43:42.000
And the county and the state that has the potential of the East lot. To create meaningful. Transformative experience.

00:43:42.000 --> 00:43:54.000
Sorry, I'm going to give you another minute from the audience. Yeah, so just to say that we have some public comments from.

00:43:54.000 --> 00:44:07.000
A lot of allies for the community. To basically request 3 very simple. Topics number one is we feel that The community engagement of the review.

00:44:07.000 --> 00:44:13.000
Have the RFP? Shabakis b 1. Can we remember, is there maybe 2?

00:44:13.000 --> 00:44:29.000
Because we have a deep kind of. Connection to how this lot can unlock the potential of Not only the disabled, really and the African market communities, but really to create a model that is not.

00:44:29.000 --> 00:44:39.000
Seen for disability forward housing. And very simply put, we know how to make that. Financing a hundred percent affordable.

00:44:39.000 --> 00:44:48.000
And the accessibility requirements. Can be done at cost. Yeah, no additional cost per square footage.

00:44:48.000 --> 00:44:54.000
As you know not accessible. So we have the technical knowledge. Thank you so much. Come on, someone else is giving you another minute.

00:44:54.000 --> 00:45:11.000
Oh, thank you so much. Oh, I've taken it. I think the unique aspect is we can all celebrate and public land, something that isn't just a public land, something that isn't just a public good.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:45:11.000 --> 00:45:22.000
But can't be a national model. For disability. Howing that is in Congress. Sanctioned with the east locked.

00:45:22.000 --> 00:45:35.000
That trade off of accessibility is not. And it shall cause the technical advantages of. Having a developer that does kind of build disability systems before housing.

00:45:35.000 --> 00:45:44.000
She is at the cost per square footage. You have it accessible, fully accessible. Steve, the art building will not cost more.

00:45:44.000 --> 00:45:55.000
At a baseline. Accessible housing, if you have. The right planning approach. You're safe to consider a lot of money.

00:45:55.000 --> 00:46:03.000
I'm sorry, so some of the trade-offs. That the council should look at. Can be addressed.

00:46:03.000 --> 00:46:13.000
Through a Not only aspirational, but in a very practical way. By using the right partners and the right dollars.

00:46:13.000 --> 00:46:19.000
So the CIO wants to be your thought partner. We will not be on the IP process with that.

00:46:19.000 --> 00:46:26.000
We need to develop that land. We just want to use our skill sets. Our technical knowledge to ensure that the city has.

00:46:26.000 --> 00:46:36.000
A massive legacy for the computers we serve. Got to do that in a way that can be. Financially feasible.

00:46:36.000 --> 00:46:45.000
The financial stacking of these. Because this is complex but other partners. In the Bay Area, I figured it out.

00:46:45.000 --> 00:46:53.000
She's saying that our technical knowledge can be part of the Discussion would really create a lot of value.

00:46:53.000 --> 00:47:03.000
And again, we were made. That's your disposal to working with you. That, but really consider more than one community partner on the RFP.

00:47:03.000 --> 00:47:17.000
Thank you very much. Thank you.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:47:17.000 --> 00:47:33.000
Hi, I'm Gene Turitz and I'm representing a group that you failed to mention in your statement, although we've been dealing with this project from 8 years ago when it all began and that's friends of Adaline.

00:47:33.000 --> 00:47:40.000
And so the little distress that we weren't important enough for the 8 years of work that we've done.

00:47:40.000 --> 00:47:49.000
To be included. We are working together. With healthy black families and the Centre for Independent Living.

00:47:49.000 --> 00:48:04.000
And we are fighting for 3 major points to be included in the framework. That is, 100% affordability that would enable those most threatened in our community to remain here.

00:48:04.000 --> 00:48:12.000
We would like to see the right to return. With those who have been forced out of Berkeley must be able to return.

00:48:12.000 --> 00:48:21.000
And we want the right to full accessibility and accommodations to enable all people with special needs to be able to reside here.

00:48:21.000 --> 00:48:25.000
Thank you.

00:48:25.000 --> 00:48:32.000
You have 1 min, so OK, this person is giving you another minute. Okay. I just want to see one.

00:48:32.000 --> 00:48:38.000
We heard of this thing about the what is the South Berkeley Community Fund. Something created that we have no idea about.

00:48:38.000 --> 00:48:48.000
So do we want this in the framework? Do we know where it's going? Do we know who's going to control it?

00:48:48.000 --> 00:48:55.000
Why should that be in the framework without a discussion with the community? Is the community a stakeholder?

00:48:55.000 --> 00:49:05.000
You don't include the community as a stakeholder in this. We feel that the community has spoken up for 8 years.

00:49:05.000 --> 00:49:09.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

At all stages of this project and to be left out. Is a, you know, is a slap in the face to all the people who have been involved in this.

00:49:09.000 --> 00:49:26.000
I hope you can improve on this. Thank you. Thank you.

00:49:26.000 --> 00:49:37.000
Good afternoon, counsel. My name is Linda Livenbaum and I'm also with friends of Adeline and fully endorsed the remarks that Gene made.

00:49:37.000 --> 00:49:56.000
Mentioned today and in the written materials is extremely important. I think one of the highlights of the Westlock process was finding developers that had had experience and sensitivity to a community like South Berkeley that has been so impacted by Bart for 40 years or more.

00:49:56.000 --> 00:50:06.000
And I think that's really crucial. Also as far as the community evaluation team, I think since The original plan was 3 city, one Bart, one community.

00:50:06.000 --> 00:50:12.000
I don't see that Bart needs to be at the table since they're not part of this project now.

00:50:12.000 --> 00:50:19.000
So there should be at least 2 representatives of the community. One from the disability community and one from residents of South Berkeley.

00:50:19.000 --> 00:50:24.000
Thank you.

00:50:24.000 --> 00:50:28.000
Thank you.

00:50:28.000 --> 00:50:34.000
Do I have 1 min or 4 min? One. All right, let's get off to the races.

00:50:34.000 --> 00:50:45.000
My name is Betsy Morris. I'm wearing 3 hats. 1st as a member of Friends of Adeline and as a leader.

00:50:45.000 --> 00:50:53.000
My coconuter there of East Bay, Berkeley, Gray Panthers. We have worked with CL.

00:50:53.000 --> 00:51:04.000
To support 100% affordable housing. Whatever amount we can get, get it built quickly accountable to the community.

00:51:04.000 --> 00:51:26.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

My 3rd hat is as a community economic development researcher and consultant for 2530 years resident-led resident owned co-housing cooperatives and other forms of social housing.

00:51:26.000 --> 00:51:38.000
Affordable and resident financed social housing. So I want to speak to the to just offer that the National Co-OP Bank, the National Co-OP Bank.

00:51:38.000 --> 00:51:49.000
Actually, I understand. Just take that down. Cooperatives are your friends. Okay, thank you.

00:51:49.000 --> 00:51:55.000
We have to go further. Thank you. Sorry I didn't practice that. I know it's tough.

00:51:55.000 --> 00:52:04.000
I know. Yes, feel free to send it to us and send us more information.

00:52:04.000 --> 00:52:10.000
Sarah Krishna, Center for Independent Living. So just quickly to reinforce a couple of points.

00:52:10.000 --> 00:52:30.000
I do think the Kelsey who operates a building in San Francisco and San Jose that is fully disability for it and inclusive and 100% affordable could offer some interesting IDEAs on how to make at least 50% but closer to 100% affordability work.

00:52:30.000 --> 00:52:37.000
It's this, this is much bigger than what the Kelsey has built, but there are people who have really, who I think can be helpful in that.

00:52:37.000 --> 00:52:42.000
And I think you're presentation was thoughtful, but I'm curious about what they could bring.

00:52:42.000 --> 00:53:00.000
We strongly support the recommendation of equity for Black Berkeley as part of an in connection to Friends of Adeline and also really do feel like the Center for Independent Living as part of the board of the Ed Roberts campus should really be a second position.

00:53:00.000 --> 00:53:08.000
The Ed Roberts campus and it's more than just that corridor like making it transit. Thank you.

00:53:08.000 --> 00:53:19.000
Another minute. Sorry, are you giving your, OK, making. It's more than just like unloading of 4 to 6 vans.

00:53:19.000 --> 00:53:31.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

The whole area is going to need to be if this is disability forward housing and inclusive housing, the whole area is going to need to accommodate accessible transit, right?

00:53:31.000 --> 00:53:41.000
Not just bar, but vans. Paratransit and it's going to need to be for residents, not just people who come and go from the ERC.

00:53:41.000 --> 00:53:59.000
And so I think having someone from the disability community, particularly someone who has experience with housing and development, will really inform and limit the costs while allowing you to be fully inclusive and create units that are adaptable as people age into disability.

00:53:59.000 --> 00:54:10.000
And then just, it would be good to get a little clearer, set-asides for people with disabilities and low income through trying to capture.

00:54:10.000 --> 00:54:18.000
Section 8, 11 vouchers and working with developers or the service. Manager, they do that.

00:54:18.000 --> 00:54:28.000
Bye. Thank you. I think there's there are folks online. And our our 1st speaker has asked for accommodation so we're going to give you an extra minute.

00:54:28.000 --> 00:54:36.000
Okay, 1st speaker is Mackay Freeman.

00:54:36.000 --> 00:54:38.000
Good evening, can you hear me?

00:54:38.000 --> 00:54:39.000
Yes, we can hear you.

00:54:39.000 --> 00:54:54.000
Good evening, I'm in. If my name is. Okay, the system. That's the sensor.

00:54:54.000 --> 00:55:04.000
I'm an awesome. Living my partner. My son, you know. Condo, we had that.

00:55:04.000 --> 00:55:19.000
That has allowed for us. Have Security. And stability. And to my child.

00:55:19.000 --> 00:55:31.000
Come on, I can support. The item. Okay. Today, which is.

00:55:31.000 --> 00:55:44.000
Thisish forward. How is he? Intersectional. I did, How's he?

00:55:44.000 --> 00:55:57.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

Okay. And acknowledgement. Of Be mindful. Of the dance is done.

00:55:57.000 --> 00:56:09.000
To this community. And that's such that. That's the goal of home. Oh, houses that were open.

00:56:09.000 --> 00:56:22.000
And also forward thinking. And transformation. And how it creates. Developments.

00:56:22.000 --> 00:56:32.000
I asked. 2 to 3. Can you use users? Nothing about this.

00:56:32.000 --> 00:56:44.000
With Alice. It just happens. This is hard times. Beh That has happy.

00:56:44.000 --> 00:56:51.000
Thank you. Your comments. Thank you. Thank you.

00:56:51.000 --> 00:57:00.000
Next is Priscilla, Priscilla Hine.

00:57:00.000 --> 00:57:01.000
Yes.

00:57:01.000 --> 00:57:07.000
Can you hear me? Okay, thank you very much, Council, and Mayor for allowing me to have an opportunity to speak.

00:57:07.000 --> 00:57:14.000
I'm also with the friends of Adeline and I agree with with what Gene and Linda has said before.

00:57:14.000 --> 00:57:24.000
But I also want to encourage. The taking of time to consider these goals and to think outside the box.

00:57:24.000 --> 00:57:29.000
Let's not fast track this. Let's really try to make some of these goals happen.

00:57:29.000 --> 00:57:40.000
It takes time. It takes a lot of creativity. It takes talking to other members of the community, other nonprofits in the community.

00:57:40.000 --> 00:57:44.000
For finding out how other people have solved such daunting problems. And listening and just being really super creative.

00:57:44.000 --> 00:58:00.000
So I just really, really encourage the taking our time and coming up so that these goals can actually happen and not just be.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

00:58:00.000 --> 00:58:08.000
You know, goals that we hope to reach. So thank you very much for your time.

00:58:08.000 --> 00:58:21.000
Thank you. Next is Wilhelmina Wilson.

00:58:21.000 --> 00:58:23.000
Greens, can you hear me?

00:58:23.000 --> 00:58:24.000
Yes.

00:58:24.000 --> 00:58:30.000
I'm greeting city council members. As you shape the RFP for the East Lot.

00:58:30.000 --> 00:58:40.000
The opportunity to continue this work through a repair to reproach must be centered. Right to stay right to return must be central to all considerations.

00:58:40.000 --> 00:58:49.000
The call for affordable housing for the black. Families that have been displaced and the most vulnerable in our communities must be at the forefront of our minds.

00:58:49.000 --> 00:59:06.000
Not only there, but also reflected in the RFP. We must also Yes, ask how deeply can we drive equity through this process and how do we support the most vulnerable in our communities.

00:59:06.000 --> 00:59:25.000
And allow them to age in place in the place where they called home. This means supporting. Ability forward housing, including community from the beginning.

00:59:25.000 --> 00:59:36.000
Oh Thank you. Thank you, William. Theresa Clark.

00:59:36.000 --> 00:59:45.000
Hi everybody. Teresa Clark with South Berkeley now. And a neighbor to the Ashby Bart station.

00:59:45.000 --> 00:59:53.000
I think the main thing I would like to see, you know, once you get the scoring criteria.

00:59:53.000 --> 01:00:02.000
Because I think That scoring criteria is kind of gonna. Reflect. What we're prioritizing over what.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:00:02.000 --> 01:00:08.000
I think, you know, how are we going, how are How was the decision making going to be made regarding?

01:00:08.000 --> 01:00:14.000
Rewarding, you know, a higher number of bedrooms or higher density in relationship to these other things.

01:00:14.000 --> 01:00:22.000
You know, that would be interesting to see. So I think it would be very helpful. For the community to really understand.

01:00:22.000 --> 01:00:40.000
How we're prioritizing things by getting like a draft. You know, scoring criteria and how many more points and maybe we use the West lot as an example and say, okay, how do we want to change the Westlot scoring criteria to the East lot?

01:00:40.000 --> 01:00:43.000
Thanks, Teresa.

01:00:43.000 --> 01:00:50.000
Next is Kelly Hammergon.

01:00:50.000 --> 01:01:07.000
I wanted to comment on the number of community members. That are going to be part of this and the token of one just feels like, oh, we can say we did it, but I really think you need to have 3 community members.

01:01:07.000 --> 01:01:26.000
Some of us for 2 you certainly need to have the disability. Community representative you need to have the organizations that are active in South Berkeley represented and it's disappointing that the way this was described and configured.

01:01:26.000 --> 01:01:33.000
Just one person. Additionally, you know, what what if something happens to that one person?

01:01:33.000 --> 01:01:40.000
You know, if you have 3, then you at least have 2 people left. On that panel.

01:01:40.000 --> 01:01:44.000
So that is my total comment. Thank you.

01:01:44.000 --> 01:01:57.000
Thank you. Thanks, Kelly. Next is Deborah Matthews.

01:01:57.000 --> 01:02:08.000
Deborah, you should be able to unmute.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:02:08.000 --> 01:02:11.000
There she is, she's unmuted.

01:02:11.000 --> 01:02:19.000
Thank you so much for, to the council, to the mayor, and to city staff for this special meeting tonight.

01:02:19.000 --> 01:02:31.000
I'm Deborah Matthews, real estate broker, 40 years here in Berkeley and a co-founder of South Berkeley now, I will speak to the housing priority of homeownership which equals reparations.

01:02:31.000 --> 01:02:38.000
When we weaken opportunities for homeownership, this widens not narrows racial and economic divides.

01:02:38.000 --> 01:02:45.000
Here in Berkeley, the cost of law the loss, the cost of lost ownership has been devastating.

01:02:45.000 --> 01:02:58.000
To report commissioned by former Mayor Jesse Aragon estimated that black ownership in Berkeley lost an average of 676,000 and wealth per household between 1,960 and 2,020.

01:02:58.000 --> 01:03:20.000
The East lot of the Ashby Bart development offers an opportunity to accept the talents to do it right, to blend forward thinking housing strategies with opportunities for new ownership.

01:03:20.000 --> 01:03:26.000
Thanks, Kabra. I'm sorry, your time is up. Thank you. I appreciate your comment.

01:03:26.000 --> 01:03:46.000
Next is Willie Phillips.

01:03:46.000 --> 01:03:56.000
Well, I see you're unmuted. You should be able to. To speak.

01:03:56.000 --> 01:03:59.000
Willie, can you hear us?

01:03:59.000 --> 01:04:04.000
We, we can come back.

01:04:04.000 --> 01:04:11.000
Next is Brianna Morales.

01:04:11.000 --> 01:04:12.000
Hi, thank you. My name is Brown. And Morales and I'm the community organizer with the Housing Action Coalition.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:04:12.000 --> 01:04:25.000
We're a supported nonprofit that advocates for more homes at all income levels across California. And we're just here in support to see this to see this BART station.

01:04:25.000 --> 01:04:41.000
Make room for housing. This is a rare opportunity to deliver lasting public benefit on valuable public land, building housing, mixed income or affordable.

01:04:41.000 --> 01:04:48.000
Next abart means fewer people. Commuting long distances, fewer cars on the road, and real climate.

01:04:48.000 --> 01:04:54.000
Benefits. Denser and fill housing is one of our best tools to fight urban sprawl and emissions.

01:04:54.000 --> 01:05:04.000
And of course this is also about the workers and families and seniors who are just trying to stay rooted in Berkeley and this project gives them a real chance to live in a walkable connected.

01:05:04.000 --> 01:05:10.000
Neighborhood in Berkeley with access to jobs transcendent schools and not pushed out or out of the region altogether.

01:05:10.000 --> 01:05:16.000
We talk a lot about our housing element goals and the fact that California is in a housing crisis.

01:05:16.000 --> 01:05:22.000
Brianna, your time is up. Thank you for your

01:05:22.000 --> 01:05:29.000
Next is David Scheer.

01:05:29.000 --> 01:05:40.000
Hi, it's great to see the work at Ashby bar moving forward. I'm looking at this in the context of the social housing study from a few weeks ago.

01:05:40.000 --> 01:05:50.000
I don't know if this is the time or if this is the project. Okay, and some of what's been talked about tonight and where we are in the process, it does seem like an opportunity.

01:05:50.000 --> 01:05:53.000
Potentially to pilot and experiment with some of the ideas around meaningful tenant governance in the administration of the building.

01:05:53.000 --> 01:06:04.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

So I think that's something to think about. As far as affordability levels.

01:06:04.000 --> 01:06:20.000
The building is going to need to generate enough revenue to support its ongoing maintenance and operations. And I hope that we are taking into account the long-term financial health of the project when we are when we are choosing when we're when we're choosing between proposals.

01:06:20.000 --> 01:06:32.000
We don't want building managers a few decades down the road. Biasing towards higher income qualifying, qualifying individuals because because that's what they feel like they need to do to make the numbers work.

01:06:32.000 --> 01:06:34.000
So I hope we're thinking about it that way.

01:06:34.000 --> 01:06:43.000
Thank you. Okay, that's the last Do we do this? Hand raised anymore. But.

01:06:43.000 --> 01:06:52.000
Actually he's not. On anymore. Is there anyone else who has public comment? Online?

01:06:52.000 --> 01:07:01.000
No, no more hands raised. Yep. Okay. All right then, so moving on to council comments.

01:07:01.000 --> 01:07:13.000
Did you want to start? Again. Yeah, I'm going to go back to councilmember Bartlett.

01:07:13.000 --> 01:07:16.000
Very.

01:07:16.000 --> 01:07:24.000
Yeah, nearing the end of our Odyssey here, 10 years. One planning commission going through this stuff.

01:07:24.000 --> 01:07:33.000
And so this of course is a really wonderful chapter to be at. And RP is a really great framework.

01:07:33.000 --> 01:07:44.000
We went this before, some of my comments you'll know. But I think, in general though, I would like to really kind of hone in.

01:07:44.000 --> 01:07:54.000
On some of the other aspects of this project and some of the elements I think should be accentuated and sort of put forward as central points.

01:07:54.000 --> 01:08:05.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

To be to be strive for in its development. So in short, economic justice. Wealth building should be front and center here.

01:08:05.000 --> 01:08:14.000
Okay. We know from, again, the, the, equitable black Berkeley report, that's a mouthful, equitable black Berkeley report.

01:08:14.000 --> 01:08:26.000
The The the redlining alone red lining suffocation of equity. An organized basis in the city.

01:08:26.000 --> 01:08:35.000
Cost as much as $700,000. And adjusted monies per household. And that includes those who moved away and those who stayed.

01:08:35.000 --> 01:08:42.000
And in total, right, just not just the site here, but in total, that's 3.2 billion dollars.

01:08:42.000 --> 01:08:54.000
And well disparity. Yeah, including all these red line neighborhoods versus not red line neighborhoods. So let's hung in on the district on where the site is.

01:08:54.000 --> 01:09:02.000
Is a rough, guesstimation. The area right where this was, right? And this is the bustling economic zone, lots of houses.

01:09:02.000 --> 01:09:12.000
Here are lots of stories about what it was like, how great it was. You know, so the, 1,971 and Bart of course was this project started in 1,972.

01:09:12.000 --> 01:09:23.000
So the year before it began, the median sale price for homes was around $26,000 maybe $27,000.

01:09:23.000 --> 01:09:33.000
I wish it was that way right now. And now this year. In 2,025.

01:09:33.000 --> 01:09:43.000
You mean sell price is about 1.3 million dollars in that exact area. And the East lot itself in this distance at the East lot alone.

01:09:43.000 --> 01:09:57.000
Roughly 55. Lots plus significant commercial corridors on either side. On on one side and one corner side with lots of jobs.

01:09:57.000 --> 01:10:07.000
Let's of stores. This is not unlike the commercial court on Sacramento. That they bulldoze for the Baron Rumford homes.

01:10:07.000 --> 01:10:13.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

Right. So. Fast forward of course 50 years and you see we're living in the result of that deficit.

01:10:13.000 --> 01:10:26.000
We see the wealth disparities, we see the poverty, etc. We see people unable to. Buy their kids houses, like their peers in this town because their parents were robbed of this equity.

01:10:26.000 --> 01:10:37.000
And this, of course, is echoed everywhere. So when we talk about repair, and I said this before in the West Live, many, many times, we love to call that repair and whatnot and it's not.

01:10:37.000 --> 01:10:39.000
It's an apartment building.

01:10:39.000 --> 01:10:45.000
There's no there's actually no correlation. But he can repair it. It's nice.

01:10:45.000 --> 01:10:50.000
I'm pro housing, of course, we love housing. But it's not repair. Not at all.

01:10:50.000 --> 01:10:59.000
And so Sing about actual repair, especially when we control the lot. I think it's very important.

01:10:59.000 --> 01:11:10.000
And. You know the the corresponding and the correlation to that Roberts campus is wonderful. Support that loving riversal design, very proud to host.

01:11:10.000 --> 01:11:11.000
The to be the home of universal design in this world, South Berkeley, very proud of that.

01:11:11.000 --> 01:11:19.000
And so not to say we can do one or the other, but it should be in the fuse.

01:11:19.000 --> 01:11:28.000
If we're going to use it, it should also be infused. With the economic justice of the black people who are robbed there.

01:11:28.000 --> 01:11:36.000
My mother almost almost had a coronary. When I showed her this plan. She's like, what are you talking about?

01:11:36.000 --> 01:11:47.000
Right, so let's be here real here. I understand of course, we know this, the economic limitations of the site is pretty small.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:11:47.000 --> 01:11:54.000
Right, so much we can monetize in that little area. And of course housing is expensive.

01:11:54.000 --> 01:12:03.000
And there's all these issues around the cost of building and maximizing. The number of people we can help with the number of ownership.

01:12:03.000 --> 01:12:10.000
Entities we can create. However, 2 things we know that in the fires of LA, because the LA Fire.

01:12:10.000 --> 01:12:17.000
There is basically an arms race. To bring in the new building materials, methodologies. Let me go on, please.

01:12:17.000 --> 01:12:29.000
Methodologies into California in the country. To California. So many of your cost projections are actively being confronted right now.

01:12:29.000 --> 01:12:38.000
By the building industry. Right now. And so by the time this thing breaks ground, who knows? What caused curves we can meet.

01:12:38.000 --> 01:12:49.000
Also different financing tools. We know that ownership is the number one element being driven right now in the housing, in the housing advocacy community.

01:12:49.000 --> 01:12:57.000
In this country and in the state. And so many, many proposals are winding its way through the different bodies to incentivize ownership.

01:12:57.000 --> 01:13:03.000
To create starter home, tax credits, etc. The same thing is used now for affordable housing development, but for ownership.

01:13:03.000 --> 01:13:11.000
All that's coming. And so by the time this building gets built, I do think. We will have a stronger chance.

01:13:11.000 --> 01:13:20.000
At achieving affordable home ownership. And this is by far what the communities asked for repeatedly the most. They want it.

01:13:20.000 --> 01:13:28.000
We know we need it. It's out of reach for everyone. But particularly again. Thinking about what was robbed from these people.

01:13:28.000 --> 01:13:38.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

And their descendants and their associates and the neighborhood does all as a whole and the community as a whole, the city as a whole, robbed of all this vitality.

01:13:38.000 --> 01:13:47.000
And we can bring it back. And so a quick couple points here. I do think we should have 3 members of the community on board here.

01:13:47.000 --> 01:13:51.000
I've served on numerous RFP committees before I was elected. I've served on numerous RFP communities before I was elected.

01:13:51.000 --> 01:13:56.000
And they're served on numerous RFP committees before I was elected. And they're on numerous RFP communities before I was elected. And they're fun.

01:13:56.000 --> 01:14:01.000
They're great for people to get involved and learn how processes work like a miniature commission. And in this instance, we have you know, strong vested interests.

01:14:01.000 --> 01:14:06.000
From the community that may be divergent, it's important to not be captured and to allow 3 different people to get in there and mix it up.

01:14:06.000 --> 01:14:12.000
And I think will benefit.

01:14:12.000 --> 01:14:24.000
Because I want someone on there who wants ownership. I want someone to fight as hard as they can. To what is ownership on that site or devise a mechanism to capture revenue.

01:14:24.000 --> 01:14:32.000
And shift it somewhere nearby to create a new program. We have lots of ideas for programs for ownership, lots of them out there.

01:14:32.000 --> 01:14:41.000
Here. That would be the karmic. Sense of development this property demands because we did not get it on the West lot

01:14:41.000 --> 01:14:47.000
We didn't get it. And that was the one to do it. That was huge. The week but bar controlled it we couldn't do it.

01:14:47.000 --> 01:14:56.000
I fought for that for years So this is our last end. And let's make it count. So I want you to consider going back and start our P and punching up the ownership.

01:14:56.000 --> 01:15:04.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

And urging the developers and they called me all the time too these people call me all the time. They can do this for this must cheap without a, they're out there.

01:15:04.000 --> 01:15:11.000
Let's let them fight to get this contract, this super high-profile development deal, let them fight to get it.

01:15:11.000 --> 01:15:23.000
And on that end, this goes along with the new developers, the new ideas, the new people, which size into our economic justice element, let's get some new developers in here.

01:15:23.000 --> 01:15:30.000
People who come from historically red line communities. They can't get a job.

01:15:30.000 --> 01:15:39.000
You should see the talented. Black architects. And developers and finance pros out there trying to get in the game.

01:15:39.000 --> 01:15:45.000
But they can't get in. And we know this from our 2016, 2,017 we passed the Bindex.

01:15:45.000 --> 01:15:56.000
That's not my name for it. They call it that. They include a diversity index. We have a pension for choosing establish Players, large entities.

01:15:56.000 --> 01:16:06.000
That are not facilitating the on ramp of new people and diverse money. And now as you see, in general, All the wealth is bound up in few hands.

01:16:06.000 --> 01:16:16.000
So it's almost like this is a continuation. Of 1,972 When you wipe out their wealth, Move it up here.

01:16:16.000 --> 01:16:28.000
And keep it there. So let's take this moment to do our part to undo the momentum and create a new momentum that's born of economic justice and access and true reparation.

01:16:28.000 --> 01:16:37.000
Thank you. Thank you, Councilmember. And you already did this, so thank you very much for setting the stage.

01:16:37.000 --> 01:16:42.000
I just, I remembered that when we had had this conversation about how we were going to have this conversation about how we were going to go through this.

01:16:42.000 --> 01:16:44.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

One of the things we were talking about how we were going to go through this, one of the things we were talking about was what we were going to go through this.

01:16:44.000 --> 01:17:05.000
One of the things we were talking about was what kinds of guidance would be helpful and you've already done it in the right way, We have the, there are threshold requirements and then there's framework that we've gotten from the community and so giving feedback on what you all think are priorities is really helpful.

01:17:05.000 --> 01:17:24.000
And so that's affordable housing priorities, the evaluation committee is our council member spoke to but also and actually this wasn't on here at the end of the slides but in the stakeholder engagement just seeing what you all think about those pieces of it as well.

01:17:24.000 --> 01:17:32.000
So just to kind of give you some structure. Councilmember Humbert. Yeah, thank you, Madam Mayor.

01:17:32.000 --> 01:17:41.000
I'm 1st I want to thank staff for all your really good hard work. On this and I know there's going to be a lot of good hard work in the future.

01:17:41.000 --> 01:17:48.000
I want to join. That's essentially 100% in councilmember Bartlett's comments.

01:17:48.000 --> 01:17:55.000
I'm not going to try to match him. He's a hard act to follow. But I want to thank him for his prodigious efforts.

01:17:55.000 --> 01:18:04.000
On this process over the years and for his really creative thinking about how we can get to where we need to go.

01:18:04.000 --> 01:18:08.000
In connection with his statement and I wrote it down. Economic justice and wealth building should be front and center in this process.

01:18:08.000 --> 01:18:23.000
I agree with that. As our president might say, a thousand percent. I'd love to see ownership.

01:18:23.000 --> 01:18:36.000
Opportunities to help create. The intergenerational wealth. Of which this community that lived around here before, 1,972 was clearly robbed.

01:18:36.000 --> 01:18:42.000
So, absolutely agree with Councilmember Bartlett on that and and that's my main comment.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:18:42.000 --> 01:18:43.000
I also want to thank our commenter Deborah Matthews who's worked on this process for a long time.

01:18:43.000 --> 01:18:55.000
I want to thank her for her very and and thoughtful comments tonight as well. Thank you. That's all I have.

01:18:55.000 --> 01:19:01.000
Thank you, other council members.

01:19:01.000 --> 01:19:07.000
Councilmember Kasarani.

01:19:07.000 --> 01:19:18.000
Okay. Thank you very much, Madam Mayor. Thank you for the presentation. Oh, I'm just seeing these, I didn't realize you had prompts for us.

01:19:18.000 --> 01:19:47.000
So, okay. So, so I, I just, only want to thank you because I think this is generally covering the topics that I think are important and obviously as the councilmember representing the neighborhoods around the North Berkeley Bard Station and seeing that process successfully lead to the land entitlement for a project that I think the vast majority of.

01:19:47.000 --> 01:19:56.000
The community is supportive of. I'm sort of looking to see how this compares to what we had for the North Berkeley Bard.

01:19:56.000 --> 01:20:14.000
And so in terms of. I just want to say that I think the goal of 50% affordability is good and setting the minimum at 35% I think that aligns with what we did in North Berkeley and I do appreciate the the, the slide on page 16 showing the trade-off there.

01:20:14.000 --> 01:20:23.000
Obviously if you have greater affordability, there is less of a market rate developer contribution that can go towards other benefits.

01:20:23.000 --> 01:20:33.000
So I think that is appropriate to leave that as a goal. The homeownership goal, I think that that is also appropriate as a goal.

01:20:33.000 --> 01:20:35.000
I do want to recognize that. There are some in my mind some significant trade-offs with this goal.

01:20:35.000 --> 01:20:54.000
One is that it serves a higher income household of 80% area median income. And You know, so I think that's important and I do want to just note that.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:20:54.000 --> 01:21:24.000
The some of our other policies are trying to serve that middle income population between the 80 20% of area median income, you know, the significant one being the middle housing ordinance accompanied with the subdivision referral that I hope that will come back to council to give people an opportunity at higher income levels to be able to buy that starter home.

01:21:24.000 --> 01:21:39.000
And so, so I'm not saying that I that we shouldn't be doing this here. I think it's a valid goal, but I think again it's good as a goal and not as a requirement because I think we need to be flexible in terms of how we do that.

01:21:39.000 --> 01:21:58.000
And I think those are really my main. Comments. I I wanted to also just note that I thought the design guidelines, I think those appear on page 23 of the presentation that those seemed reasonable.

01:21:58.000 --> 01:22:15.000
Again, I was looking to how they compared to North Berkeley Bart, which is also adjacent to a residential neighborhood as the East lot is and so I think the the setbacks of 5 to 15 feet that aligns with what we did in North Berkeley.

01:22:15.000 --> 01:22:23.000
Upper story step backs. So, so that also makes sense and. I think having that. The 300 minimum bedroom count that is going to be a requirement, correct?

01:22:23.000 --> 01:22:53.000
So I think that's important because. When we go all the way back to our joint vision and priorities, we talked about, you know, having a significant number, Thinking so much in percentages, you know, for a long time we were talking about 100% level of affordability, but I think we've come a long way in realizing what is realistic and practical and delivering homes in a reasonable time frame is

01:22:57.000 --> 01:22:58.000
also important. You know, people can't wait 2030 years for, for the site to get developed.

01:22:58.000 --> 01:23:17.000
They've already been waiting very long time. So, so, I just want to appreciate how far we have come and this site, sort of the Ashby lots.

01:23:17.000 --> 01:23:25.000
They were much more complex. Then North Berkeley. Site and that is why it has taken so long.

01:23:25.000 --> 01:23:44.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

There were air rights. That the city held for the Ashby station. And so the reason why we've now acquired this East lot is because we entered into this East lot is because we entered into negotiations with Bart so that we entered into negotiations with Bart so that they entered into negotiations with Bart, because we entered into negotiations with Bart so that they would be able to take full responsibility of developing the West lot, they would be able to take full responsibility of developing the West lot, which is what we're

01:23:44.000 --> 01:23:48.000
not talking about. Full responsibility of developing the West lot, which is what we're not talking about.

01:23:48.000 --> 01:23:53.000
And then we could take responsibility for this lot. So this is an incredible opportunity for us. And I'm just looking at the last question here.

01:23:53.000 --> 01:24:06.000
Does the evaluation process ensure a robust review of proposals. I think so. I want to make sure that in addition to the community representation that we make sure we have expertise on the panel that reviews these proposals.

01:24:06.000 --> 01:24:22.000
Because in my mind, I'm just finishing my thought here. Just some, I think there's going to be significant technical detail in these proposals.

01:24:22.000 --> 01:24:35.000
We are equipped to be able to evaluate each of them fairly and responsibly. And so that would be my request that we make sure that we have.

01:24:35.000 --> 01:24:43.000
You know, that expertise on the panel as well. Thank you very much. Thank you, other councilmembers.

01:24:43.000 --> 01:24:55.000
Yup, go for it. Yeah, go ahead. Thank you, Mayor. I just want to say briefly, I just want to thank staff, of course, for all the work.

01:24:55.000 --> 01:25:01.000
And I also just really want to thank Council Member Bartlett. I plus, for all the work. And I also just really want to thank Councilmember Bartlett.

01:25:01.000 --> 01:25:03.000
I plus wanted everything you said, not only because you are the council person for this district. So that's something right there, but also you spent a huge amount of time on this and everything you said was really reasonable and great.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:25:03.000 --> 01:25:17.000
So just wanted to say thank you and yes. Oh. Okay, Councilmember Lunapara.

01:25:17.000 --> 01:25:26.000
Thank you. Yeah, I wanted to echo what some of my colleagues have been saying. I also want to think Councilmember Bartlett for all the work that he's put into this and for trying.

01:25:26.000 --> 01:25:36.000
To do the very difficult task of bridging. All the different stakeholders, which is what makes Ashby particularly, you know, harder than.

01:25:36.000 --> 01:25:48.000
North Berkeley, so thank you and great job. I do have questions about the building form objective standards part but this might be.

01:25:48.000 --> 01:25:58.000
Bigger than this project. I guess I'm curious what the goal of some of these.

01:25:58.000 --> 01:26:12.000
Standards are for example the having the maximum continuous facade length be 170 feet, which I guess creates the, back and forth type of building and why.

01:26:12.000 --> 01:26:18.000
It can't be more than a single or 80% of the facade be a single material. What are the goals of that?

01:26:18.000 --> 01:26:31.000
Of those standards. Well, high level goals that we talked about in the presentation, one of them is to ensure that the pedestrian experience is as positive.

01:26:31.000 --> 01:26:41.000
And you know, one of the examples, the maximum facade length, sometimes when you're walking next to a long continuous facade, it really feels aressive.

01:26:41.000 --> 01:26:51.000
We have on the line, Chris Centenck. Who is the design professional that assisted the city in the development of these ODS?

01:26:51.000 --> 01:27:01.000
So I want to turn it over to Chris to talk a little bit more about the thinking of the standards that you mentioned.

01:27:01.000 --> 01:27:04.000
I think you're muted. Yeah, Chris, you're muted. There you go.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:27:04.000 --> 01:27:10.000
Sorry about that. Thank you, Jordan. Yeah, I think you hit it on the building length.

01:27:10.000 --> 01:27:19.000
You know, it's You know, this is facing. A bunch of, smaller buildings and homes.

01:27:19.000 --> 01:27:45.000
And to minimize that distance without a break. Make the building feel smaller. And the the purpose behind the materials is to really provide more variation and human scale details and so that you don't get a hundred percent stucco building.

01:27:45.000 --> 01:27:59.000
Okay, thank you. I also am curious if the thought process is Do we think that there would be any ground floor commercial or do we anticipate that being residential?

01:27:59.000 --> 01:28:07.000
So I can say the ground for nonresidential uses are permitted. But we're not.

01:28:07.000 --> 01:28:19.000
Requiring it in the solicitation. OK, that makes sense. I think something if a developer does choose to have ground floor commercial, I think it would be.

01:28:19.000 --> 01:28:27.000
Great for to also incorporate some of the same ideas of. Right to return for some of the businesses that were displaced.

01:28:27.000 --> 01:28:34.000
By the BART development also, or long-standing businesses in the area that are. At risk of displacement.

01:28:34.000 --> 01:28:40.000
Thank you. Thank you, Councilmember Bakovi.

01:28:40.000 --> 01:28:47.000
Thanks, man, Mayor. I'll be brief. Thank you to staff again. Consultants for the presentation.

01:28:47.000 --> 01:29:11.000
The process is that we lay out clear threshold. Requirements we lay out strong goals but then we leave a lot of flexibility and creativity for the developers to come back and say here's what we think we can do and I think as you wrote a lot of the document, there's a lot of language about looking for that kind of creativity and inspiration to really try and wow us about what's possible because we don't know what's

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:29:11.000 --> 01:29:18.000
possible but we are looking to work with partners who have big vision for what is possible. And that's part of the evaluation process.

01:29:18.000 --> 01:29:24.000
So I really like that. We're not being too prescriptive. We're laying out goals without being too prescriptive.

01:29:24.000 --> 01:29:44.000
I also want to thank Council Member Bartlett for his leadership. And, I think we all acknowledge up here that it's really impossible to fully write the past wrongs, but we are trying to do our best wrongs, but we are trying to do our best wrongs, but we are trying to do our best to acknowledge, but we are trying to do our best to acknowledge and then do whatever we can do to acknowledge and then do whatever we can do to help repair some of the damage done in this

01:29:44.000 --> 01:29:53.000
process. And again, I think it's really important for all of us to be mindful as we go through this that that's still centered and that's kind of a key goal of this.

01:29:53.000 --> 01:30:02.000
It's not of course developing more affordable housing is an important goal but also centering the community that has been affected and that will benefit from this work is really important.

01:30:02.000 --> 01:30:09.000
And so just to keep reminding us of that in the RFP and then to come from our Bartlett and the team to keep us honest about that as we move forward.

01:30:09.000 --> 01:30:15.000
So thank you very much. Thank you, other councilmember, oak Council member Treko, I see you online.

01:30:15.000 --> 01:30:28.000
Yeah, thank you so much. I wanted to also thank staff. For not just the comprehensive presentation but the comprehensive body of work that they have.

01:30:28.000 --> 01:30:37.000
Done over many years and will continue to do and of course would like to thank Council member Bartlett for his leadership on this project.

01:30:37.000 --> 01:31:01.000
And I would like to thank the community members that. You know, the nothing about us without us is, a quote that, rings, Still, still wings with a clarion call in in my head as I am thinking about the public comments that we heard today.

01:31:01.000 --> 01:31:11.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

I did have a question, that I have not yet asked. Of staff first.st

01:31:11.000 --> 01:31:23.000
Can you please remind me? I know in previous renditions, There was a commitment to.

01:31:23.000 --> 01:31:51.000
Provide a space for the farmers market use and I understand that the farmers market has gone through. Perhaps some ownership or management changes since then but I'm wondering if this is on the east lot or did it move to the west lot?

01:31:51.000 --> 01:31:52.000
I'm sorry, yes, the flea market.

01:31:52.000 --> 01:32:00.000
So I think you're referencing the Berkeley flea market. Yeah, it's really the West Lot project in combination with City of Right of Way.

01:32:00.000 --> 01:32:07.000
That will be providing a future home to the flea market. Rather than the slot.

01:32:07.000 --> 01:32:18.000
Yeah, I, I am clear on the trade-offs and I think.

01:32:18.000 --> 01:32:24.000
I mean, I would like to associate myself with, comments that have been made about the opportunities.

01:32:24.000 --> 01:32:34.000
That this is already. And ambitious project. And I.

01:32:34.000 --> 01:32:48.000
All too keenly and somewhat painfully recognized that there is perhaps no level of ambition on this project that May truly make.

01:32:48.000 --> 01:33:08.000
The, South Parkley residents. Was ancestors for it negatively impacted. By gentrification and, displacement.

01:33:08.000 --> 01:33:19.000
Starting or perhaps continuing in the sixties and 70. Up to now. That it might not make everyone fully hauled.

01:33:19.000 --> 01:33:29.000
And yet, this is an invitation. And a challenge to all of us to think deeply through this.

01:33:29.000 --> 01:33:37.000
And do the very best. That we can. To build something. That is.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:33:37.000 --> 01:33:47.000
Emblematic. Off. Barclays, vision and creativity.

01:33:47.000 --> 01:34:00.000
That our community. Demonstrates. And it is with that in mind. That if I was going to make an overarching comment and request.

01:34:00.000 --> 01:34:18.000
And this is what I'm going to do now. It is to look at. You know, I heard loud and clear from the community and even before that it's I understand the reason you know to have 5 members and an advisory committee.

01:34:18.000 --> 01:34:42.000
And to have perhaps the city of Berkeley. Have a majority that's 3. That may leave one member of the community but i don't believe that that is enough and there is no single member of the community that can authentically speak for the lived experiences of everyone in that community.

01:34:42.000 --> 01:34:54.000
And so I would really like for us to think through what it What it what might be possible to increase the composition of community members.

01:34:54.000 --> 01:35:04.000
To at least 2. And if that means expanding the overall number. Of. Committee members to 7.

01:35:04.000 --> 01:35:11.000
Or some other odd number. Then I would fully support that. Thank you.

01:35:11.000 --> 01:35:16.000
Thank you. Okay, look at this. We might end on time. OK, other comments?

01:35:16.000 --> 01:35:23.000
Just want to make sure. Oh yes, go ahead, Kelsey. Sorry, I can't remember if I mentioned this in my comment, but if I didn't.

01:35:23.000 --> 01:35:29.000
I just want to thank staff, the planning department so much. Thank you for all of your work. Yes, absolutely.

01:35:29.000 --> 01:35:40.000
OK, so final comment. I of course also want to say thank you again, I think I said earlier, but again, I, of course, also want to say thank you again, I think I said earlier, but again, I think I said it earlier, but again, again, thank you.

01:35:40.000 --> 01:35:45.000
I know this is a lot of work and I really appreciate it earlier but again again thank you. I know this is a lot of work and I really appreciate, I know it wasn't intentional to leave out friends of Adaline.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:35:45.000 --> 01:35:46.000
I know this is a lot of work and I really appreciate, I know it wasn't intentional to leave out friends of Adeline.

01:35:46.000 --> 01:35:58.000
I know it wasn't intentional to leave out friends of Adeline. I know that friends of Adeline has been involved throughout this process and I know because we've been having conversations where you mention all these different organizations and groups and individuals that you've spoken with and all the comments and feedback.

01:35:58.000 --> 01:36:07.000
Really knows that this team has been really listening and worked very hard to make sure that those comments were put into this document.

01:36:07.000 --> 01:36:13.000
So I just want to make sure folks know that. South Berkeley most of the time that I've lived in Berkeley.

01:36:13.000 --> 01:36:17.000
I'm very connected to the South Berkeley community. And many of the folks in the audience are neighbors that I see quite regularly, literally walking down the street.

01:36:17.000 --> 01:36:43.000
So I'm really grateful for you all being here and just your comments and your thoughts and of course to Councilmember Bartlett as well for his work and his passion on this topic because we do really understand that this BART station really impacted the community and we can't talk about this project without talking about racial justice.

01:36:43.000 --> 01:36:48.000
So I'm really grateful for folks bringing that into the room and to this space. Let's see.

01:36:48.000 --> 01:36:58.000
So in terms of these questions, I do really feel like this framework does show us what the community is, I do really feel like this framework does show us what the community is asking for this framework does show us what the community is asking for.

01:36:58.000 --> 01:37:03.000
It brings in of course the priorities asking for, it brings in of course the priorities that we have. It brings in of course the priorities that we have and I agree with folks that have said, of course, the priorities that we have.

01:37:03.000 --> 01:37:04.000
And I agree with folks that have said that I think what's going to be the priorities that we have.

01:37:04.000 --> 01:37:05.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

And I agree with folks that have said that I think what's going to be challenging is figuring out which priorities are more important.

01:37:05.000 --> 01:37:13.000
So let me tell you, I also agree that we need to increase the number of community members. I think one is just not enough.

01:37:13.000 --> 01:37:14.000
So many different community members who've been engaged in this process. And so I'd like to see us increase that number.

01:37:14.000 --> 01:37:27.000
I have a couple of questions. Is there a reason that Bart needs to be included? That question was asked by a community member and I'm curious.

01:37:27.000 --> 01:37:45.000
If it was a requirement. Actually, it's not prescriptive. It was kind of a decision that the steering committee, the team of agencies made because Bart has a decision that the steering committee, the team of agencies made because Bart has recently reviewed 2 very similar RFPs made because Bart has recently reviewed 2 very similar RFPs and the staff there have a lot of expertise made because Bart has recently reviewed 2 very similar RFPs and the staff there have a lot of

01:37:45.000 --> 01:37:59.000
expertise in sort of thinking about this master development finance. So I think our team. Perceived that as a benefit and almost like extra support for the technical staff in the city.

01:37:59.000 --> 01:38:09.000
Some reason. So I think that that makes a lot of sense and given that it's above part, there are things that will interact with each other and so I think that's important and really valuable as a perspective to bring in.

01:38:09.000 --> 01:38:13.000
As councilmember Kesarwani mentioned, having the technical expertise to bring in. As a perspective to bring in.

01:38:13.000 --> 01:38:26.000
As Councilmember Kessurani mentioned, having the technical expertise is important here too. And the other question I wanted to ask that was brought up by a community member which is how will our affordable housing preference policy play into this project?

01:38:26.000 --> 01:38:32.000
Could you speak to that?

01:38:32.000 --> 01:38:42.000
Yes, so the the city's affordable housing preference policy would apply to the affordable rental developments in the project. It is specific to the affordable rental developments in the project.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:38:42.000 --> 01:38:58.000
It is specific to rental housing rental developments in the project. It is specific to rental housing. Other financing in the project that is not if it's not just local funds or like the BMRs that are privately financed but if there's other state or federal funds we typically do.

01:38:58.000 --> 01:39:21.000
We do have to get. We do a fair housing analysis and determine the percent of units. That the preference policy can be applied to and we have to get authorization from the state and I think in the past recent projects that we've done it's been about 75% I am actually going to

01:39:21.000 --> 01:39:26.000
Defer, does that? I don't know. Richard Kobis is here in May, recall if it was.

01:39:26.000 --> 01:39:33.000
75%. Okay, not sure. I think it was, I think it was 75%, but I can verify that.

01:39:33.000 --> 01:39:43.000
Sure, that would just be helpful for the community. I know and this policy is. Similar. So I just wanted to make sure I brought that up.

01:39:43.000 --> 01:39:50.000
And then I know we've been talking about homeownership. And that piece I think is really interesting.

01:39:50.000 --> 01:39:59.000
I think it's interesting that it's in there. I think I'm concerned about the trade-offs between affordable housing and ownership.

01:39:59.000 --> 01:40:08.000
Say that. And then the last thing that I think is really important is the universal design piece. So right now this is written in here as a priority, as something that we're interested in having.

01:40:08.000 --> 01:40:18.000
And I just want to set this stage a little bit to say that I got a chance to visit the Kelsey, which is in San Francisco, which is a universal designed building and it was amazing.

01:40:18.000 --> 01:40:32.000
I think that something I want to highlight for folks is that universal design is for everyone. It's not just for folks, it's not universal design is for everyone.

01:40:32.000 --> 01:40:38.000
It's not just for folks, it's not just to be accessible for folks who have disabilities and I think especially about the folks in our community who are aging.

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

01:40:38.000 --> 01:40:43.000
We have a really large aging population rapidly growing and we I love that we have that in our community.

01:40:43.000 --> 01:40:47.000
It's amazing, but we need to make sure we have housing that's safe for people to live in.

01:40:47.000 --> 01:41:04.000
And it also goes for folks who are pregnant or it also goes for folks who are pregnant or just generally need more accessible design.

01:41:04.000 --> 01:41:13.000
Give and given that the Ed Roberts campus programs and services are right there. I think we really have a special and unique opportunity to have.

01:41:13.000 --> 01:41:26.000
Complementary services and support housing and support for folks also with disabilities. And so I would like to see this as a required element in the design standards.

01:41:26.000 --> 01:41:38.000
So, and Councilmember Kazimani, did you want to add something? Or not thanking Councilmember Bartlett.

01:41:38.000 --> 01:41:43.000
For his leadership on this. Over more than a decade. So I wanted to make sure I did that.

01:41:43.000 --> 01:41:57.000
Thank you very much. Okay. Well, thank you all. I think that you actually have us something for us to vote on that we Can you see to take action on the resolution?

01:41:57.000 --> 01:42:08.000
Sorry, second. We'd love you to take action on the resolution. I'm just pulling up the

01:42:08.000 --> 01:42:20.000
Thank you. Resolution itself. So The action on here is to adopt a resolution authorizing the city manager.

01:42:20.000 --> 01:42:31.000
To or designate to expend housing trust fund dollars to acquire real property at the Ashby Bart East law in accordance with the exchange agreement authorized by ordinance 7.

01:42:31.000 --> 01:42:36.000
9 3 9 dash ns

01:42:36.000 --> 01:42:43.000

Unofficial Text File

This information provided by Zoom. The City of Berkeley cannot certify the following text since we did not create it.

So is someone, would someone like to make that motion? Moved by Councilmember Bartlett.

01:42:43.000 --> 01:42:53.000
Second. And we have some online, so could you please take the roll? Okay, on the motion to adopt the resolution, Councilmember Kessarwani.

01:42:53.000 --> 01:42:57.000
Yes. Taplin? Yes. Bartlett?

01:42:57.000 --> 01:42:58.000
Hi.

01:42:58.000 --> 01:42:59.000
Yes. Tragub. Yes.

01:42:59.000 --> 01:43:00.000
Blackaby? Yes. Luna Para. Yes.

01:43:00.000 --> 01:43:03.000
And Mayor Ishi. Yes. Okay, thank you, Sa. Thank you so much.

01:43:03.000 --> 01:43:18.000
Thank you so much. Appreciate it. So for folks that are here for the 6 o'clock meeting it is 9 min been sitting for almost 2 h so I want to give us a little bit more than 9 min.

01:43:18.000 --> 01:43:24.000
So we will be back in 20 min. Okay, thank you everyone. To adjourn. Is there a motion too?

01:43:24.000 --> 01:43:29.000
Oh yes, we do need to actually adjourn. Thank you. Okay, can we have a roll please?

01:43:29.000 --> 01:43:33.000
Okay to adjourn the meeting. Councilmember Kesser. Okay to adjourn the meeting.

01:43:33.000 --> 01:43:35.000
Councilmember Kesar, OK, to adjourn the meeting. Councilmember Kisserawa.

01:43:35.000 --> 01:43:39.000
Big folks, I'm sorry, we're taking a vote. Kaplan. Yes.

01:43:39.000 --> 01:43:40.000
Hi.

01:43:40.000 --> 01:43:52.000
Okay, yes. Black, yes. Unapara. Yes.

01:44:05.000 --> 01:44:14.000
